

Jason Corey

Art Director | Web Developer | Designer

Hello! I'm an art director by trade, but I've recently taken the plunge into web development. My newly acquired web dev skills have given me the ability to take my love of design and layout to a whole new level of creative awesomeness. Bringing an idea to life through design and development is an amazing process and I can't get enough of it! I'm proud to say that I'm an art director with a passion for coding! So let's build something awesome together!

Experience

General Assembly Web Development Immersive January-April 2017

Participated in a 12 week program dedicated to full stack web development.

Projects I worked on:

A puzzle/hacking game that ties in with the viral marketing of JJ Abrams' Cloverfield film series. The game was made using HTML/CSS, JavaScript, and JQuery.

A full stack app that allows users to post interesting/useful APIs to various categories. The app was made using using Ruby/Sinatra, PostgreSQL, HTML/CSS, Less, JavaScript, and JQuery.

A full stack app that displays parking ticket information for NYC. It allows users to input a local address to see when & where parking tickets have been issued. The app was made using Ruby/Sinatra, PostgreSQL, HTML/CSS, Less, JavaScript, JQuery, Less, and D3.js.

RPM Advertising Art Director | 2014-2017 Jr. Art Director | 2012-2014 Print, Out of Home, Digital
